🎓 Experienced Tutor | University of Oxford | PhD in Chemistry

With a PhD in Chemistry from Oxford and a BSc from Imperial College London, I bring over two decades of teaching experience. Specialising in IB, A-Level, and IGCSE Chemistry, I've helped students excel. My role as a former IB examiner and Head of Department enhances my exam-focused teaching.

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

With two decades of teaching experience, I have worked with students from around the world, helping them succeed in IB and A-Level Chemistry. My time as Head of Chemistry at a prestigious UK school allowed me to gain a deep understanding of different learning styles and how to best approach difficult topics. I've also had the opportunity to train other teachers in best practices for classroom instruction.

As an IB examiner, I've developed a keen eye for what examiners look for, helping my students approach exams with confidence. My experience teaching across various curriculums, including GCSE and IGCSE, has allowed me to work with students at different stages of their academic journeys. Each lesson is crafted to build strong foundations, helping students tackle even the most challenging exam questions.

I enjoy guiding students in both the theoretical and practical aspects of chemistry, ensuring they are well-prepared for both coursework and exams. My goal is to foster a genuine interest in the subject, which leads to improved academic performance and long-term success in their studies.
