🎓 IB Teacher | University of Geneva | MSc in Molecular Biology

I have an MSc in Molecular Biology from the University of Geneva and specialise in IB, IGCSE, and A-Level Biology. I enjoy helping students tackle challenging concepts and excel in their exams, while fostering a deep appreciation for biology.

Teaches: IB Biology A-Level Biology IGCSE Biology GCSE Biology AP Biology

Curriculum: IB A-Level GCSE IGCSE AP

## Qualifications

**University of Geneva:** MSc in Molecular Biology (2018–2020)

**University of Zurich:** BSc in Biochemistry (2014–2018)

Vetted Tutor

## Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

## Tutoring Experience

With over 5 years of tutoring experience, I've supported students from high school through to undergraduate level, focusing on IB, IGCSE, and A-Level Biology. My sessions emphasize a thorough understanding of biology concepts, preparing students for exams and practical research work. I have worked with students from diverse academic backgrounds, offering guidance in everything from cell biology to immunology.

I specialize in helping students navigate their internal assessments and research projects, ensuring they meet the necessary standards. Over the years, I've seen many of my students not only excel in exams but also pursue successful careers in biological sciences. Whether it's genetics or biochemistry, my focus is on creating a comprehensive learning experience that fosters curiosity and growth.

In addition to tutoring, I provide support for students working on research publications and bioinformatics projects. My aim is to inspire a love for biology while helping students reach their academic goals, no matter how complex the subject matter.
